TEST EVENTS [NONE SELE...
Create new test event
Create new test event
Test event
Save
Test
To invoke your function without saving an event, configure the JSON event, then choose Test.
Invocation type
Synchronous
Executes the Lambda function and blocks until receiving the function's response, with a maximum timeout of 15 minutes.
Asynchronous
Enqueues the Lambda function for execution and returns immediately with a request ID.
Event name
MyEventName
Maximum of 25 characters consisting of letters, numbers, dots, hyphens and underscores.
PROBLEMS OUTPUT CODE REFERENCE LOG TERMINAL
Execution Results
Status: Succeeded
Test Event Name: hello-world
Response:

Lambda > Add triggers
Add trigger
Trigger configuration Info
S3
aws asynchronous storage
Bucket
Choose or enter the ARN of an S3 bucket that serves as the event source. The bucket must be in the same region as the function.
s3/lambda-eventsp
Bucket region: us-east-1
Event types
Select the events that you want to have trigger the Lambda function. You can optionally set up a prefix or suffix for an event. However, for each bucket, individual events cannot have multiple configurations with overlapping prefixes or suffixes that could match the same object key.
All object create events
Prefix - optional
Enter a single optional prefix to limit the notifications to objects with keys that start with matching characters. Any special characters must be URL encoded.
e.g. images/
Suffix - optional
Enter a single optional suffix to limit the notifications to objects with keys that end with matching characters. Any special characters must be URL encoded.
e.g. .jpg
Recursive invocation
If your function writes objects to an S3 bucket, ensure that you are using different S3 buckets for input and output. Writing to the same bucket increases the risk of creating a recursive invocation, which can result in increased Lambda usage and increased costs. Learn more
I acknowledge that using the same S3 bucket for both input and output is not recommended and that this configuration can cause

S3FileUploadTrigger
Throttle
Copy ARN
Actions
The trigger lambda-eventsp was successfully added to function S3FileUploadTrigger.
